

Experiment2 candidate elimination

```
import pandas as pd

data = pd.read_csv("trainingdata.csv")

concepts = data.iloc[:, :-1].values
target = data.iloc[:, -1].values

S = concepts[0].copy()
G = ["?" * len(S)]

for i in range(len(concepts)):
    if target[i] == "Yes":
        for j in range(len(S)):
            if concepts[i][j] != S[j]:
                S[j] = "?"
    else:
        for j in range(len(S)):
            if concepts[i][j] != S[j]:
                G[j] = S[j]
            else:
                G[j] = "?"

print("Training Data:")
print(data)

print("\nSpecific Hypothesis:")
print(S)

print("\nGeneral Hypothesis:")
print(G)
```

The screenshot shows a VS Code editor window titled "CandidateElimination". The Explorer pane on the left shows the project structure with files `trainingdata.csv`, `candidate_elimination.py`, and a folder `CANDIDATEELIMINATION`. The main editor shows the code from the previous block. The TERMINAL pane at the bottom shows the output of the program, including the training data, specific hypothesis, and general hypothesis.

```
PS C:\Users\student\Desktop\CandidateElimination> & C:\Users\student\AppData\Local\Programs\Python\Python312\python.exe c:/Users/student/Desktop/CandidateElimination/candidate_elimination.py
Training Data:
  Sky Temp Play
0 Sunny Warm Yes
1 Sunny Cold Yes
2 Rainy Warm No
3 Sunny Warm Yes

Specific Hypothesis:
['Sunny' '?']

General Hypothesis:
['Sunny', '?']
PS C:\Users\student\Desktop\CandidateElimination>
```

Tip: Try the [Plan agent](#) to research and plan before implementing changes.

`candidate_elimination.py`
